

Obs' COP 2022

Climate Change And Public Opinion International Observatory

A NEW, LARGE-SCALE SURVEY CONDUCTED BY IPSOS FOR THE 4TH CONSECUTIVE YEAR

Every year, EDF produces an international report on opinions, knowledge, expectations and levels of commitment in relation to climate change, to support reflection on the subject and contribute to the constructive search for future solutions.

IN 30 COUNTRIES

INCLUDING THE BIGGEST CO2 EMITTERS

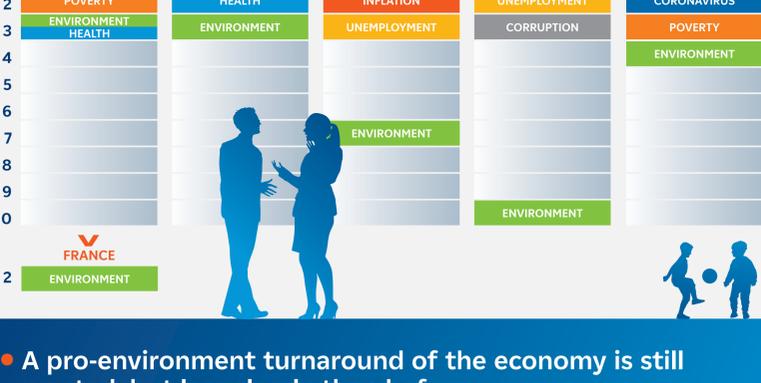

2/3 OF THE WORLD'S POPULATION REPRESENTED

CLIMATE EMERGENCY: WHERE ARE WE AT?

Pressure on purchasing power on a global scale

From this list, which topics worry you the most?

A pro-environment turnaround of the economy is still wanted, but less clearly than before

Which of the following two statements do you agree with most?

Priority should be given to:

...THE ENVIRONMENT, even if it might slow down economic growth in your country and cause job losses

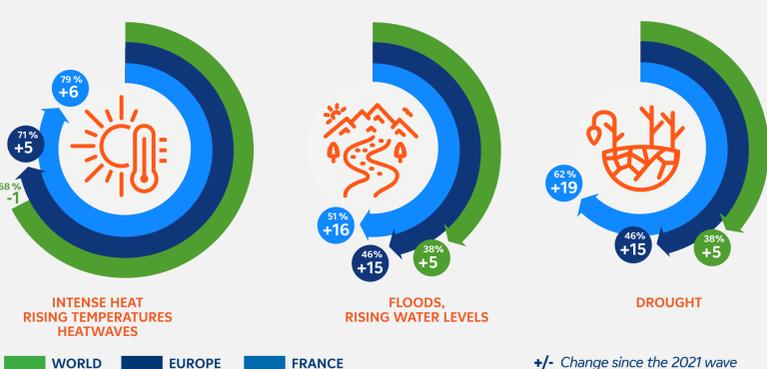

...ECONOMIC GROWTH and jobs, even if it might have harmful consequences for the environment

DON'T KNOW

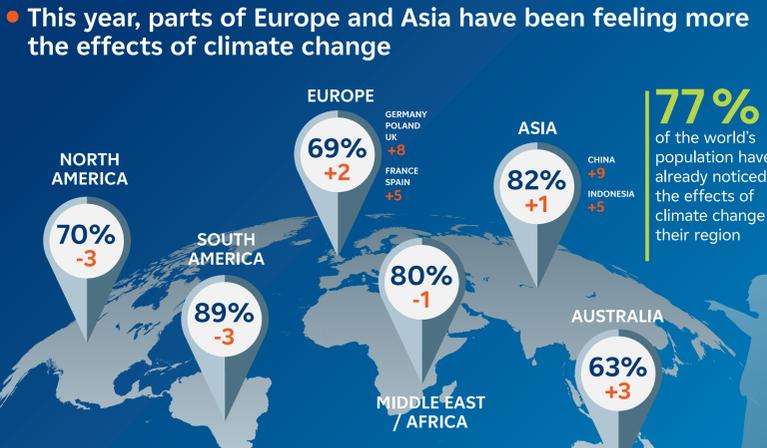

Europeans heavily impacted by the drought and intense heatwaves of the summer

Among those who have observed the effects of climate change in their region

This year, parts of Europe and Asia have been feeling more the effects of climate change

For 2/3 of the world's population, climate change is the first priority within environmental issues

TOP 3 environmental concerns

Acknowledgement of human responsibility for climate change is decreasing

TOP 3 most climate-skeptical countries

CLIMATE CHANGE: WHO SHOULD TAKE ACTION AND TO DO WHAT?

Government and private players seem more involved, while citizen engagement is dropping behind

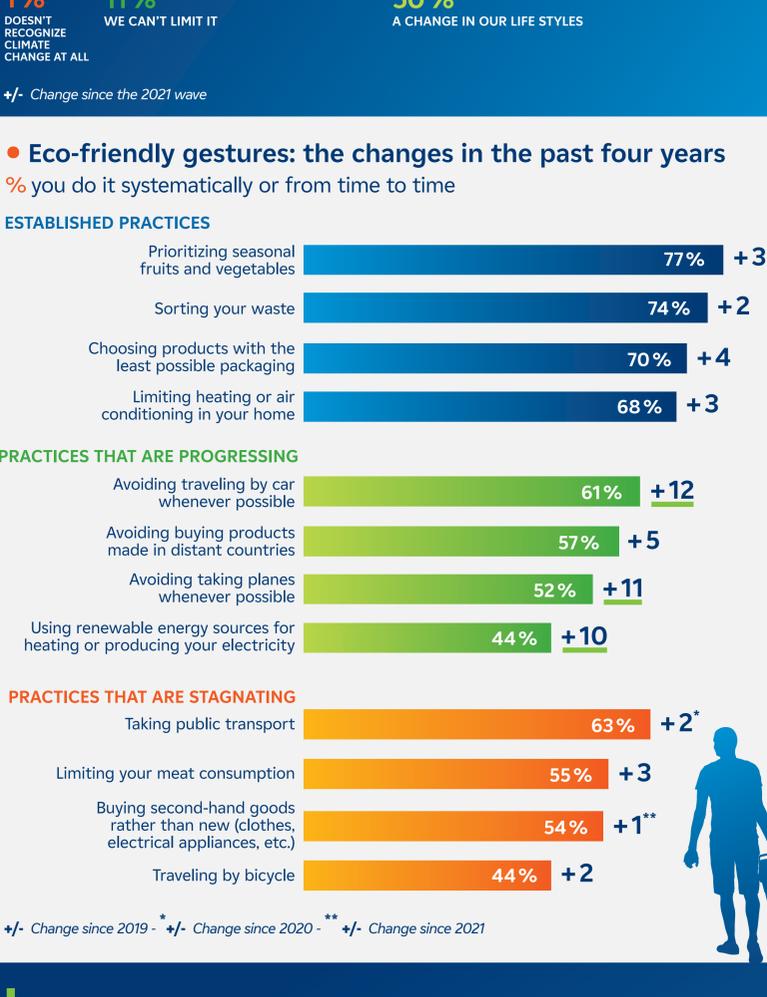

Change our life styles or gamble on technology, two factions that have changed little

The preferred solution to fight climate change

Eco-friendly gestures: the changes in the past four years

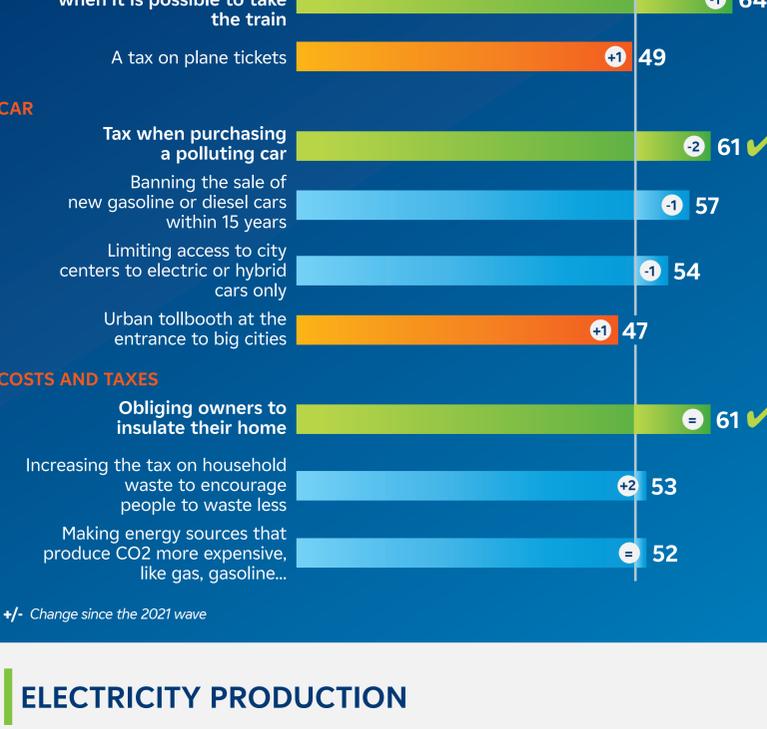

% you do it systematically or from time to time

ACCEPTABILITY OF CLIMATE POLICIES

Limited acceptance of constraints

Only 3 restrictive measures are accepted by 6 out of 10 respondents

ELECTRICITY PRODUCTION

Within an energy shortage context: fossil fuels and nuclear energy are progressing again

To produce the electricity that you will need in the future in your country, are you in favor of or against the following production methods?
